-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12 and 23-28, drawn to an imaging device and method comprising means for illuminating a point in an observed plane (illumination point), means for forming an image of said illumination point, scanning means, and detection means.

Group II, claim(s) 13-19, drawn to a microscope system comprising means for illuminating a zone in an observed plane (illumination zone), scanning means, a mask dividing the observed plane into a beam coming from the illumination zone and a beam coming from a secondary detection zone, means for forming images of each of these beams, and means for combining the two images.

Group III, claim(s) 20-22, drawn to a microscope system comprising means for illuminating a zone in an observed plane (illumination zone), means for selecting a detection zone, means for forming an image of the detection zone, scanning means, detection means, and means for combining the two images..

2. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

- Group I provides the special technical feature as the means for selecting the light coming from a band surrounding the illumination point.
- Group II provides the special technical feature as the mask composed of microprisms.

- Group III provides the special technical feature as a means for modifying the characteristics of a mask between the capture time for the first image and the capture time for the second image.

The special technical features for each of the groups are not present in the other groups.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to STEPHEN YAM whose telephone number is (571)272-2449. The examiner can normally be reached on Monday-Friday 8:30am-5pm.
